SUMMARY

I'm an energetic senior software engineer with 6+ years of hands-on experience architecting and shipping production-grade platforms in FinTech and SaaS startups.

I thrive as a high-autonomy builder, taking products from idea through full-stack development to reliable, secure infrastructure. Most recently I led end-to-end development and Kubernetes/GCP operations at a FinTech startup (Next.js/Astro, Node.js, PostgreSQL, advanced security, observability). Previously I founded Aclipt, a global appointment-booking platform.

What I bring:

- Deep expertise combining modern full-stack development (Next.js, React, Node.js, TypeScript) with strong DevOps/SRE practices (Kubernetes, Terraform, Ansible, GitHub Actions, Prometheus/Grafana)
- Obsession with security and reliability (OWASP, WAFs, bot mitigation, encryption, chaos engineering)
- Product ownership and fast execution in fast-paced, ambiguous environments

Based minutes from Geneva and fluent in French + English, I'm particularly excited about helping ambitious teams quickly establish and scale technical presence in Europe.

Open to high-impact conversations; especially with teams building the future.

EXPERIENCE (6 years)

Senior Software Engineer & Product Owner | Stealth FinTech Startup | Remote, France | **Mar 2025 – Mar 2026**

★ Spearheaded full-stack application development and deployment using Next.js (migrated to Astro), Node.js, PostgreSQL with Prisma ORM, Redis caching, Tailwind CSS, RESTful APIs, webhooks, and crypto features like hot/cold wallets, deposits/withdrawals, and blockchain scanning via cron jobs; optimized for performance with SSR/SSG, TypeScript, secure sessions, i18n, theming, and client/server validation for resilient user experiences.

★ Engineered scalable infrastructure on GCP with Terraform for IaC, Ansible for hardening/configuration/automation (including HTTPS via Let's Encrypt and WireGuard VPN), pgBackRest backups, and shell scripting; ensured high availability in production while implementing OWASP-compliant security like Nginx WAF, rate limiting, bot/CAPTCHA defenses, encryption at rest/transit,

SKILLS (1-6 years)

Programming & Frameworks

Expert (5+ yrs):

TypeScript/JavaScript, Node.js, React, Next.js, Astro, Tailwind CSS, HTML/CSS

Proficient (2-4 yrs): Python,

Vue.js/Nuxt.js, Redux

Familiar (≤1 yr): Rust,

Angular, Django/PHP, Remix.js, Cordova, Jest

and fault-tolerant designs for crypto systems.

- ★ Deployed high-availability Kubernetes clusters with replication, auto-scaling, anti-affinity, rolling updates, probes, and Helm charts for CNPG PostgreSQL, Opstree Redis, and Kube-Prom-Stack; integrated Istio service mesh, HashiCorp Vault secrets, Kafka streaming, Ceph/Rook storage, and ArgoCD/Argo Workflows for GitOps CI/CD with zero-downtime multi-environment releases.
- ★ Built comprehensive observability with Prometheus, Grafana, Loki/Promtail, Cadvisor, Alertmanager, custom exporters/dashboards for Redis/PostgreSQL/Node.js, and ELK logging; enabled proactive alerts to reduce MTTD/MTTR and support peak-load tuning.
- ★ Championed SRE practices through resilience testing, failure simulations, performance optimization, and cross-functional alignment of DevOps with full-stack goals, delivering enterprise-grade, growth-ready platforms.

Sr Full-Stack Engineer | Product Technical Lead | nBold.co & Microsoft Teams App (Station F, Paris) | **Jan 2022 – Feb 2025**

- ★ Launched two modular extensions—Connected Apps and nBold Analytics—leveraging nBold’s public APIs for low-code CRM integrations (e.g., Salesforce, HubSpot) and real-time usage insights, driving seamless workflow automation and data visualization.
- ★ Automated CI/CD pipelines and infrastructure provisioning with Docker Compose, GitHub Actions/Workflows, Terraform for IaC, and Azure, standardizing build-test-deploy processes with integrated testing, validation, and observability for dev/staging/prod environments.
- ★ Engineered Connected Apps as a tray.io-powered in-Teams app store, empowering non-developers to create custom workflows; developed Next.js forms for user input, automating notifications and alerts in Teams channels based on CRM events.
- ★ Designed nBold Analytics as a client-facing metrics engine using PostgreSQL, PostgREST, Jitsu, and Metabase for interactive, real-time dashboards enabling clients to visualize CRM/third-party data; created custom dashboards to monitor and analyze key performance indicators.
- ★ Built dynamic connectors with Next.js, React Hook Form, Zod, Redux, and Axios, ensuring robust validation, error handling, and secure data flows in low-code configurations.
- ★ Led R&D on architectures and micro-frontends; conducted technical interviews and influenced product roadmap to align strategic goals.
- ★ Enforced comprehensive documentation, ESLint/Husky workflows, and security best practices to accelerate team onboarding and maintain high code quality; integrated Prometheus for internal monitoring of system health and performance.

Technologies: Docker · GitHub Actions · Terraform · Azure · Next.js · Prometheus · React · TypeScript · Tailwind CSS · tray.io · PostgreSQL · PostgREST · Jitsu · Metabase · Zod · Redux · ESLint · Husky · Jest

Founder | Aclipt | Paris, France | **Mar 2020 – Jan 2022**

- ★ Founded and scaled Aclipt, an enterprise-grade free global appointment-booking PWA, growing to 2,000+ users and 150 professionals

DevOps & Cloud (IaC)

Expert (3+ yrs): Docker, Kubernetes (k8s), Ansible, Terraform, GitHub Actions, Prometheus/Grafana, Loki/Promtail, Alertmanager, ELK Stack (Elasticsearch, Logstash, Kibana), GCP, Shell Scripting (Bash/Python), Cron Jobs, Linux (Debian/Fedora/Qubes OS)

Proficient (1-2 yrs): AWS, Azure, Bare-Metal Hosting, k3s, kubeadm, Server Hardening

Familiar (≤1 yr): Kustomize, ArgoCD/Workflows, Ceph/Rook, PagerDuty

SRE & Security

Proficient (1-2 yrs): OWASP Practices, Bot Mitigation/CAPTCHA, TLS/Encryption, Rate Limiting, WAF, Cloud Security, Session Management, OpSec/PGP

Familiar (≤1 yr): SLIs/SLOs/Error Budgets, Incident Response/Chaos Engineering, Open Policy Agent (OPA), RBAC, Cert-Manager, Vault/Raft

Architecture & Performance

Expert (3+ yrs): SSR/SPA/SSG Optimizations, SEO/UX Tuning, Caching (Redis), Scalable Design, Multi-Cloud Architectures, Webhooks, Micro-Frontends

Databases & Storage

while processing 4,000+ bookings before sunset due to funding constraints.

★ Architected scalable, geo-distributed backend on GCP using App Engine, Cloud Build for CI/CD, Cloud Storage, and IAM for secure access—managing global traffic with automated, resilient deployments.

★ Integrated real-time search and features via Firebase (Functions, Firestore, Auth, Messaging, Dynamic Links) and ELK stack (Elasticsearch, Logstash, Kibana), alongside Google Maps API for sub-second location-based queries.

★ Automated payments, subscriptions, and reminders with Stripe (tiered/usage-based billing), cron jobs in Firebase Functions, and SMS via smsMode—reducing no-shows by 20% and streamlining revenue flows.

★ Embedded robust security and compliance using OWASP best practices, GDPR-aligned data handling, validations, and automated vulnerability scanning within CI/CD pipelines.

★ Developed responsive frontend with Vue.js/Vuetify and optimized SEO/growth through SSR metadata, structured data, and dynamic sitemaps for enhanced visibility and conversions.

★ Enabled cross-platform mobile experiences: Android via Trusted Web Activity (TWA) and iOS via Apache Cordova (with SPA fallback), achieving full App Store integration.

★ Managed complete product lifecycle from ideation and UX design to technical documentation, deployment, and customer success coordination. Technologies: GCP · App Engine · Cloud Build · Firebase · ELK Stack · Google Maps · Stripe · Vue.js · Vuetify · Github Actions · JavaScript · Node.js · smsMode · Stripe · TWA · Apache Cordova

Personal Projects & Early Experience

★ Vendunt: Built online marketplace for historic beverages using Shopify and Remix.js, with payments and SEO integrations.

★ Personal Website (e10v.com / emrinangelov.com): Developed with Vue/Nuxt.js, AWS, and GitHub Actions & Pages for static generation.

★ SOLUTEC Internship: Engineered AI chatbot with TensorFlow, integrated into Django web environment.

EDUCATION (Master's Degree)

Politecnico di Milano: Computer Science and Engineering

Milan – Città Studi, Italy | 2018 – 2019

Field of Study: Computer science with a focus on software architecture and digital project management.

École Supérieure d'Ingénieurs Léonard de Vinci: Engineering and Computer Science

Paris – La Défense, France | 2016 – 2018

Focus: IT, big data, and cloud infrastructure.

Field of Study: general engineering with focus on information technology, big data, and cloud infrastructure.

Prépa Chaptal: CPGE PTSI-PT* – Higher Science and Technology

Paris 75008, France | 2014 – 2016

The Higher School Preparatory Classes consist of two intensive years of science and technology training.

Expert (3+ yrs): PostgreSQL, MySQL, Prisma ORM, Redis, Elasticsearch

Proficient (1-2 yrs): MongoDB, Firebase

Familiar (≤1 yr): Kafka/KRaft, RabbitMQ

APIs & Integrations

REST/GraphQL, OAuth2/JWT, Webhooks, Stripe (Payments, Subscriptions), Crypto (Wallets, Blockchain)

Other Tools & Concepts

Expert (3+ yrs): Linting/Formatting (ESLint/Husky), Cryptocurrency Integrations, SEO Tooling, Agile Methodologies, WordPress

Familiar (≤1 yr): Jira/Confluence

Soft Skills

Cross-Functional Teamwork, Problem Solving, Research/Analysis, Stakeholder Communication

Languages

English — Fluent (C2)

French — Fluent (C2)

Interests

Entrepreneurship (Startups/Prototypes), Technology (AI/Crypto/PC Builds), Creative Media (Photoshop/Premiere/OBS), Learning, Long-Distance Running
